

Project Overview

Hutchinson Builders were awarded the design and construct contract in January 2006 to undertake Toowoomba Central Plaza. Toowoomba Central Plaza is the largest building to be constructed in the Toowoomba CBD and regarded as Hutchinson Builders most challenging project undertaken by the Toowoomba team. The building comprised a 9 storey mixed development located in the heart of the Toowoomba CBD. Works involved 2 ½ levels of underground parking, with 3 levels of retail/commercial space and 7 levels of residential services apartments. Additional works involved the high level fit out of both the Swish Restaurant/Wine bar and Ella Bache Beauty Salon located on the ground floor. This project was hugely successful and was delivered on time and budget.
