

CABARITA OCEAN RETREAT

Lot 1 Casuarina Way CABARITA NSW

Project Overview

The project consisted of an exclusive health retreat built on a large parcel of beach front land situated at the very southern end of Casuarina. The building is 3 levels with 8 themed rooms on the first floor and an owner's unit on the top floor. The top floor has viewing platforms with views to the nearby Casuarina Beach shoreline. The ground floor consists of a large open restaurant, gymnasium, and day spa area including hair salon, flotation pool, spa, massage room and Vichy shower. The project became known as the "Big Fish" to those who worked on its construction because the architectural design both in layout and appearance resembles a large fish. The client made visits to Italy to ensure the correct Italian marble tiles were selected. The finishes throughout the building can only be described as opulent. High quality furnishings were selected and the rooms on the first level were creatively themed as Bali, France, China, India, Italy, Greece & Surf. The fully imported green marble floor tiles on the ground floor areas reflect images from outside through large bi-fold doors that open up the entire restaurant area to the landscaped gardens.
