

GENESIS RESIDENTS CLUB

Coomera, Queensland

Delivery System: Design and Construct

Project Details

New construction of a residents recreation club with a bar, kitchen and gym facilities. The club makes use of recycled water for irrigation and toilet services and has a cBus building management system to manage the electrical and mechanical operations to maximum efficiency. The newly constructed pool has a 25m lap pool and cascading 17m infinity edge. It also features a shallow play area for children. The outdoor entertaining areas include BBQs, gazebo and amenities which surround the pool complex.
