Environmental

We are committed to delivering construction projects in an environmentally responsible way from start to finish.

To achieve this, we:

- Have defined clear environmental objectives that align with the strategic direction of the business
- Follow legal and other requirements relating to environment
- Remove or reduce environmental aspects to prevent undesirable environmental impacts
- Implement procedures to protect the environment to prevent pollution and protection of the environment
- Review and continually improve the environmental management system

As Australia's largest privately owned construction company, we are committed to reducing the environmental impact of our construction work wherever we can.

Everyone working on our sites is required to follow the site rules to help protect the environments we work in.
