

HUTCHIES' TRUTH

A QUARTERLY NEWSLETTER FOR HUTCHINSON BUILDERS

MAY 2010

Big slice of the Apple Isle pie

HUTCHIES' success in Victoria has spilled across the Bass Strait and into Tasmania, with a new branch office and many projects blossoming on the Apple Isle.

The Hutchies' team members, who volunteered to go down to Tasmania six months ago, are on track with their goal to secure a five per cent slice of the Tasmanian construction market during 2010/2011.

Key people are Mick Connolly as team leader and Michael White and Bree Hoek as contracts administrators.

Work in Tasmania consists of the \$3.5 million Bridgewater Regional Trade Training Centre and the \$1.6 million Rokeby Primary School.

Work is expected to start soon on other projects including Buretta Waste Management facility, St Therese's, Lindisfarne North Primary, and Princes Wharf.

Hutchies has expanded its scope of activity in Australia through its involvement with the Federal

HAVE UTE ... WILL WORK! Hutchies' Tassie crew with Mick Connolly, Team Leader (front), and (standing, L-R) Darrel Slyp, James Keane, Michael White and Bree Hoek.

Government's Building the Education Revolution (BER) schools program as part of the national stimulus package.

All Hutchies' projects in the schools program have been won in the open tender market.

The latest package in Victoria consists of eight separate schools in the north western suburbs of Melbourne with a combined value of \$11.5 million.

They include three refurbishments at Ascotvale Primary School, Debney Meadows Primary School and Footscray City Primary School and five template build-

ings which are a mix of multi-purpose and library/learning centres at Moonee Ponds Primary School, Niddrie Primary School, Stevensville Primary School as well as St Albans North and St Albans South.

Hutchies' team on the schools package is:

Project Manager: Graham Spence
 Contracts Administrator: Paul Hunt
 Foremen: Danny Nincevic / Noel Sutherland
 Cost Planner: James Flanagan
 Architect: Hayball / Graypuksand
 Structural Engineer: Walbridge & Gilbert
 Project Manager: SKM / Davis Langdon

ANOTHER project in Victoria is Stage 1 of the Australian Radiation Protection and Nuclear Safety Agency (ARPNSA) at Yallambie in the north east of Melbourne.

The \$5 million project covers external works, extension, fit-out and refurbishment of existing operating laboratory, workshops and offices to be completed in five phases.

Hutchies' ARPNSA team is:

Project Manager: Graham Spence
 Foreman: Daniel Hennessy
 Estimator: Tim Rogers
 Project Manager: Lambert & Rehbein

The \$3.5 Million Bridgewater project takes shape.

Good news despite bad press

DESPITE some of the negative reports surrounding the Federal Government's Building the Education Revolution (BER) program, with claims of over spending, Hutchies helped one school get real value for money.

At Bald Hills State School, the 10 per cent of contingency savings from the school's allo-

cation of \$2.6M for a multi-purpose hall and \$400,000 for a library was ploughed back into the projects.

Hutchies worked closely with the school during construction, resulting in the new hall being 15 per cent larger than planned with the extra addition of a purpose-built stage and change rooms.

➤ **Taigum State School's BER project handed over by Hutchies' team four weeks ahead of schedule. Pic, story Page 2 & 3.**

Country boy meets Dame Edna

NOW that Jack is a fully fledged country music recording executive, he says it is important for him to "walk the walk and talk the talk."

He is developing a new image so he will be taken seriously by the industry in Nashville.

First is a new set of spectacles ... matching hat, shirt, pants and boots are work in progress.

Jack admits to being advised in his fashion make-over by good friend, Dame Edna Everage.

➤ **Read more on Jack, the country music executive, on Page 3.**

Council Chambers in Brisbane's "new" City Hall in Ann Street which will be in use for the next three years until restoration of the old City Hall is completed.

Transplant for city's administrative heart

BRISBANE City Hall has been transplanted from King George Square to 157 Ann Street.

The shift didn't include the historic old City Hall building itself, but it did involve the entire city administration, including the Lord Mayor, Councillors and public servants.

Brisbane's iconic City Hall is in need of structural remedial work expected to cost \$230 million over three years and an existing office building in Ann Street was refurbished by Hutchies to serve as "City Hall" for the next three or four years.

The job required the fit-out of 12 floors in four months to house the Lord Mayor's and Deputy Mayor's offices, Council Chambers, administration and function rooms, Over 50's Centre, Museum of Brisbane and shower and bike storage facilities.

The project was delivered in various portions.

The Lord Mayor and Deputy Mayor's offices, administration offices and one function room (Levels Four, Five, 10 and 13) were handed over on December 16 last year.

Council Chambers and two levels of administration offices (Levels One, Six and 11) were handed over on January 16, 2010.

The Over 50's Centre and more administration offices (Levels Three and 12) were handed over on February 4 and another

function room on Level Two on February 26.

The Museum of Brisbane on the ground floor and the bike storage area in the basement were delivered on March 22.

The "new" City Hall was built in 1983 and consists of three levels of carpark and 14 floors, including ground level.

All floors were demolished and stripped out before Hutchies started work.

The building was in poor shape with most services requiring significant alteration and upgrading.

The exterior of the building will remain the same except for Brisbane City Council signage and the Australian, Queensland, Brisbane and Aboriginal flags mounted on new flagpoles from the fourth floor balcony.

The Lord Mayor's function area on Level 13 has unobstructed views of old City Hall and King George Square.

The moving process and the hand-overs progressed seamlessly in a tight timeframe, with final works finishing just hours before each hand-over.

Peter Brown, Brisbane City Council senior architect, congratulated Hutchies and its subcontractors for their "professional attitude throughout the process".

He said it had been a great team effort, relying on good cooperation between various trades and the supervisors.

From the Managing Director

THERE are several areas of our operation we continue to drive, despite the tendency to back off a little due to the economic climate.

They are quality and apprentice training.

Our people now accept that it doesn't cost any more to get quality right, than it does to get it wrong.

The reality is that, in the long run, it costs a lot less to get it right the first time.

We have a very simple strategy for quality at Hutchies:

- Plan ahead and ensure we are applying the most appropriate construction techniques.
- Be proactive and show subbies and our own workers exactly what we want and then supervise the works.
- If you do get it wrong, then fix it.

At the end of the day, our clients are entitled to a quality product and, at Hutchies, we guarantee to deliver exactly that.

On the training front, we are maintaining our apprentice numbers at around 200, although it would be extremely easy to pull back this program for economic reasons.

However, our aim is to train people the Hutchies' way, build them into the company at every level in the hope many of them develop into leaders who will take Hutchies forward into the future.

Some of the characteristics of our scheme are:

- We have developed our own training material, in conjunction with SkillsTech.
- About 95 per cent of all trade training is done on site with very little lost time off the job
- All current apprentices receive a minimum of six to nine months hands-on carpentry training which includes working with timber, hanging doors, doing decks, etc.
- We promote many of our apprentices early, into leading hand and foreman roles, contracts administration positions and sometimes into estimating and cost planning.

We're not certain what the economic future will bring, so we have decided to do all we can to preserve what we have developed over the years through fighting hard for our share of work around Australia and in all sectors regardless of how big or small the project might be.

Hutchies' strong balance sheet is proving to be a wonderful advantage in these tough times.

Quality, training and financial strength is our formula for continued success.

— Greg Quinn
Managing Director

Shave for a cure big head turner

Hutchies' shaving efforts raised more than \$5000 for charity.

HUTCHIES' crew from the Little Beach (Salacia Waters) project on the Gold Coast entered two teams in the Leukaemia Foundation's World's Greatest Shave during March and raised more than \$5000 for the charity.

Those who didn't shave their hair had it coloured.

Sara Francis, assistant Regional Community Fundraiser for the Gold Coast Leukaemia Foundation of Queensland, said the results were "absolutely astounding".

"After the World's Greatest Shave weekend, Hutchies is certainly within the Top Five highest fundraisers for the state," she said.

Jack floats a new venture

JACK Hutchinson, who has been King of the Road to the Tamworth Country Music Festival for many years, has crowned his reign with involvement in production of a country music CD, *I'm Alright Jack*.

The CD stars Leslie Avril, an amazingly versatile entertainer who has dazzled audiences around the world with her country music, piano bar and jazz shows.

Based in Melbourne, Leslie is a headline act every year at

Tamworth and identified Jack's encouragement as the main reason for cutting the new CD.

"Jack and his posse come to Tamworth from Brisbane every year and insist that my producer/arranger, Sam Lemann, and I join him for lunch at the Nundle Pub," said Leslie.

"That lunch has become the highlight of our Tamworth social calendar."

Every year Jack asked the same question – "When are you going to make another CD?"

Finally, Leslie agreed and *I'm Alright Jack* evolved.

Jack, who has followed Leslie's music for 12 years, helped select the songs which were recorded in Melbourne.

The album includes four

Leslie and Sam originals, many from local songwriters, who are long time friends and collaborators, and a couple of old classics.

Leslie describes herself as "sexy, with personality."

"I'm not cutesy pie or safe or tame," she said.

"I sing strong-women songs and some men find strong, honest, humorous women intimidating and confronting."

"But to me country music is rock 'n' roll for the over 30s."

Mort Fist, writer for the *Northern Daily Leader* in Tamworth, caught her act and enthused that she "shimmied, shook, strutted, flaunted and flirted."

"But most of all she sang," he said.

"Searing ballads, followed by driving rockers, all delivered with a voice full of power, style and class."

"But what hammered home was her irresistible sense of fun."

Visit www.leslieavril.com to find out more about Leslie.

Reader's Competition...

"I spy with my little eye..."

THE old wooden boat that features on the cover of *I'm Alright Jack*, is the *Lindsay Symons*, a 10ft single sail clinker dinghy owned by the Wooden Boat Association in Victoria.

Readers are invited to suggest what our Cap'n Jack hopes to see with his eyeglass from the cramped deck of the *Lindsay Symons*.

The best entry will win a CD, signed by Leslie and Jack.

Those who miss out on a winning a free CD can order one online or through Hutchies' Nicole Jones at njones@hutchinsonbuilders.com.au or enquire at their local country music store.

EMAIL your entries to:
competition@HutchinsonBuilders.com.au

What does Jack see? "I spy with my little eye..."
• ENTRIES CLOSE: 31/05/10 •

FEDERAL Treasurer Wayne Swan is pictured with students at the official opening of two new buildings at the Taigum State School.
A new multi-purpose hall and a resource centre were funded under the Government's Building the Education Revolution (BER) schools program and were handed over by the Hutchies' team four weeks ahead of schedule.
Hutchies' Team included project manager Bree Hoek, site manager Jamie Washington and team leader Russell Fryer.

Cairns waterfront \$9.2M upgrade

Queensland Treasurer and Minister for Employment and Economic Development, Andrew Fraser, joined local State MPs Steve Wettenhall, Jason O'Brien and Curtis Pitt, as well as Clive Skarott, of Ports North, and Hutchies' Paul DeJong, to turn the first sod on the Cairns Cruise Liner Terminal upgrade.

HUTCHIES has started work on the upgrade of the Cairns Wharf – a structure as old as Hutchies itself.

Both were established in 1912 and Hutchies' experience and expertise will help to deal with the work which will require conservation of heritage items.

The \$9.2 million project involves an upgrade of the Cairns Cruise Liner Terminal which includes refurbishment of the heritage shed, construction of pedestrian zones, covered access to new bus and taxi bays and extensive tropical landscaping.

The upgrade will comprise building works and provision of associated civil works and services including demolition and

alterations, structural rectification, modification and additions; replacement of existing roof and wall cladding and services; upgrade and refurbishment of existing wharf fender and bollard system; stormwater for drainage; road pavements, kerbs, ramps, footpaths and feature paving; electrical works; landscaping; security fencing and signage, as well as conservation of heritage items.

The client is Ports North and Hutchies' team includes Paul DeJong, Stuart Saw, Darryl Knight and Chris Hattingh.

Architects are Total Project Group and Arkhefield Architects. Consultants include Cardno, MGF and CMRP.

Victoria Towers over Southport

THE Gold Coast's newest retirement project is a hive of activity, as Victoria Towers climbs skyward on the Gold Coast.

The 35 storey high-rise, on the corner of Scarborough and White Streets, Southport, will contain four levels of aged care facilities and 30 levels of residential units.

Hutchies' client is Lotte Engi-

neering and Construction with primary consultants being the Alliance Design Group.

The \$82 million project is due for completion in April next year.

Hutchies' team leader is John Berlese with administrator Tim Ferguson and site manager Terry Bowden supported by Chris Taylor and Joey Cassin.

Cairns crane fleet expands

Hutchies' crane fleet in Cairns has expanded with delivery of a new crane to work on Stage Two of the Port Village project at Port Douglas. Hutchies completed Stage One of Port Village in 1999 and, a decade later, has been engaged to complete Stage Two.

QUAD PARK STADIUM

Artist's impression of the sports stadium to be constructed by Hutchies at Quad Park at Kawana Waters on the Sunshine Coast. The new \$7.5 million 1000-seat spectator stadium will also contain player facilities and function areas. Hutchies' team includes Brad Miller, team leader; Noel Ryan, project manager and administrator; Scott Woods, site manager; and Michael Michell, cost planner. Design is by Argo Designs and structural engineering is by SP Consulting.

High speed action for Emergency Operations

WORK is proceeding well on the Queensland Emergency Operations Centre at Kedron due for completion late this year.

The project valued at more than \$45M is the construction of a new emergency operations centre for the Department of Emergency Services at the Kedron Park complex.

The department has designed the facility in line with world's best practice to create a highly effective communications and disaster coordination management centre for Queensland.

Information and communication technology will be a major aspect to the project achieving world class status.

Hutchies' team leader is John Berlese and primary consultant Architectus.

The Department of Emergency Services \$45M operation centre, Kedron.

Creating future workforce from within

Winners and gridders at the annual Apprentice and Cadet of the Year Awards for Brisbane-based apprentices.

THE annual Apprentice and Cadet of the Year Awards for Brisbane-based apprentices was held recently at the Toowong Rowing Club.

More than 120 guests, including apprentices, team leaders, site supervisors, subcontractors, parents, partners and key business associates, congratulated this year's winners.

Special guests included Jack and June Hutchinson, Managing Director, Greg Quinn, and the 2009 Construction Skills Queensland/Master Builders North Queensland Apprentice of the Year, Giancarlo (Pozz) Pozzebon.

Pozz has finished his apprenticeship with Hutchies' Townsville team and is now a leading hand.

He is an excellent role model and displays the epitome of the characteristics Hutchies looks for, such as strong work ethic, attention to detail, success with study and good organisational and leadership skills. This year's winners are:

- *First Year Apprentice Encouragement Award* – **Michael Balzun** (James Loveday Team)
- *Second Year Apprentice Encouragement Award* – **Nicholas Robertello** (John Berlese Team)
- *Third Year Apprentice Encouragement Award* – **Andrew Taubman** (Harry White Team)
- *Fourth Year Apprentice Encouragement Award* – **Bryce Ward** (Harry White Team)
- *Future Leaders' Encouragement Award* – **Alex Avetisoff** (Fred Brands/Russell Fryer Teams)
- *Cadet of the Year* – **Tom Wilson** (Russell Fryer Team)

- *Apprentice of the Year* – (a tie) **Ayden Holmes** and **Max Finlayson** (Russell Fryer Team).

The tie for Apprentice of the Year was a first for the Awards and indicated the strong competition for this prize as well as the depth of capability within the apprentice ranks.

Managing Director, Greg Quinn, said Hutchies had maintained its commitment to young leaders of the future by ensuring none was stood down during the worst of the GFC.

"The coming year, while continuing to be a challenge, will see the Workforce Development Programme continue to refine its strategies," he said.

"Ultimately, it is Hutchies' teams and subcontractors who hold the key to success, because without their continuing support and willingness to give young people the work experiences and training they need, Hutchies would not be able to create the workforce it needs for the future.

"The company currently has more than 170 apprentices, 34 future leaders and eight cadets working in its offices spread from Cairns to Tasmania, demonstrating its commitment to developing a future workforce from within its own ranks.

"The Workforce Development Programme developed in recent years is seen by the Board of Hutchies as critical to ensure the company has the capability to take on the challenges that will occur in the industry from the continuing effects of the Global Financial Crisis."

Mick's heart of gold acclaimed

HUTCHIES' Mick Rookwood (alias "Mick The Hoist Man") got a big wrap from Anthony Newman, of Thump Architectural Fittings, after his kind gesture to a little boy.

Each night, Anthony tells his four-year-old son, Jonty, building stories and when he told the story about "Mick The Hoist Man", who gave away lollies on site, Jonty was keen to meet him (for obvious reasons).

Anthony checked with Mick who said it would be okay.

When Jonty arrived on site (at the Scott St Project, Kangaroo Point), with hard hat and high-vis vest, Mick pulled out a huge bag of sweets, decorated with truck pictures and a Bob the Builder card.

Mick made the little bloke's day!

Anthony said that in the construction world of deadlines, business negotiations, stuff ups and blame shuffling, it was a rare and golden moment – and one he would never forget.

"If there is an employee of the month award at Hutchies, or any other recognition program, give it to Mick," Anthony said.

"And if he hasn't had a pay rise in a while, give him one."

Student success for Rosny pupil

Chris Sablowski on Hutchies' Bridgewater site.

CHRIS Sablowski, the 300th graduate of Rosny College, Tasmania, with a VET Certificate 1 in General Construction, has joined Hutchies.

He now has the flexibility to start work in Tasmania and then move north when the opportunity arises.

Hutchies helps build a village

HUTCHIES has helped sponsor construction of an orphanage in Uganda through its association with International House.

Already, donations of about \$1000 have been sent to help meet the cost of building Labora Village in Gulu, about four hours from the country's capital of Kampala.

The organisation responsible for all the building works is Watoto.

Watoto children's homes are not orphanages in the traditional sense, but are constructed in the form of small, vibrant communities referred to as villages.

Watoto villages include clusters of homes, a nursery school, a kindergarten, primary school, high school, vocational training centre, water project, medical clinic and a multi-purpose hall for use as a church and as a community centre.

For more information on the Ugandan projects visit www.watoto.com

Hutchies contract administrator, Alistair Pillay, said he was hoping to arrange a Hutchies' team in the near future to go and take on a few more building projects to assist with the work of Watoto.

Purpose-built centre for AEIOU

At the official opening of the purpose-built AEIOU facility at Griffith University Nathan campus were (L-R:) Russell Fryer, Tom Wilson, Rob Gee and Sam Harmsworth from Hutchies, along with Paul Watson and Simone Macginley of The Buchan Group.

Picture shows, from left, (at rear) Simone Talty, Mark Towers (apprentice), Greg Quinn and Andy Charnley (site manager) and (front) Dianne Geia, Cheynoah Eagleday and Chantel Weare.

Indigenous training program

HUTCHIES' team, working on the Mookai Rosie Bi-Bayan Maternal and Child Care facility in Edmonton, south of Cairns, includes four indigenous women.

Construction of the Mookai Rosie Hostel includes a training

program to allow indigenous engagement to be maximised.

The women employed on the project are undertaking their Certificate II in construction.

During a recent visit to Cairns, Managing Director, Greg Quinn, visited the site.

Congratulations...

YOU will recall we met earlier in the year at which time you assured me that Hutchinson Builders would provide me with a fit-out of a quality we would be happy with, at a price we would be happy with and a time frame we would be happy with.

Well, I want to tell you that you were correct on all of these points.

I am pleased we used HB on this engagement, and I have recommended HB to at least three other businesses looking to fit out office space in Brisbane.

I would like to congratulate HB on the manner in which the project was managed, from Fred Brands and his senior team, right down to the tradies on the job.

At no stage did I have any cause for concern on HB performance.

– Paul Vincent

High quality...

IN nearly forty years, I've never seen such a high quality finish on a project.

– Senior State Government inspector, commenting on Hutchies' Mount Gravatt Special School project.

Fantastic effort...

I WANTED to write to you personally to acknowledge the fantastic effort by your company

in relation to our Riverside Green project.

Under very tight deadlines and a demanding worksite, Hutchinson Builders performed superbly.

In particular, Site Manager, Mike Tickner, and Contract Coordinator, Brent Nowland, deserve specific recognition.

They were client focused, proactive and committed to an effective working partnership.

We and our visitors are very pleased with the end result.

– Malcolm Snow,
Chief Executive Officer
South Bank Corporation

Commended...

THROUGHOUT the entire project the open, constructive and professional manner in which Hutchinson Builders interfaced with Tarong Energy is to be commended.

In particular, the Tarong Energy Project Team would like to acknowledge the contribution and the individual and collective support of Searle Balladone, Chantal Malaponte, and Oliver Windbulcher whose integrity, proactive approach and fair dealing was evident at all times.

Our transition to our new fully functional premises at 42 Albert Street was seamless and achieved on target.

Helen Gluer,
Chief Executive Officer
Tarong Energy Corporation
Limited.

All aboard the banana boat express.

Doing the limo line-up.

Whisked away for a weekend

THIS year the Hutchies' Ladies were transported to the Gold Coast by two super stretch luxury limousines to spend their weekend away at Couran

Cove Island Resort, on South Stradbroke Island.

Weekend entertainment included spa treatments, massages and banana boating.

Ocean Grove at Dee Why.

Dramatic rescue takes place on Sydney's North Shore

HUTCHIES has performed an amazing rescue at Dee Why, the famous surfing beach on Sydney's North Shore.

Teamwork resulted in resuscitation of the Ocean Grove project for the Dee Why RSL Club, following the demise of the previously appointed builder and formworker.

Hutchies was asked to take over the project when it was half finished and hampered by uncertainty among subcontractors and the workforce.

With assistance and commitment from the Dee Why RSL Club, Hutchies was able to recommence work only three weeks after site closure, using many of the key subcontractors who were relieved by the rapid restart.

The fast restart was expedited by Hutchies being able to provide certainty on the final contract sum and completion date to the satisfaction of the client and its financiers.

Effective management of existing subcontractors and outstanding industrial matters also led to the successful restart of the project.

The Dee Why RSL Club has served the Sydney North Shore community for more than 60 years and will continue to do so with the Ocean Grove development which consists of 76 senior living apartments in three buildings, each serviced by a lift.

Common facilities include library, lounge, billiards, hobby and conference rooms and a Wellness and Fitness Centre.

All aboard for fun cruise

THE Valentine's Day Social Club Cruise departed from Marina Mirage, Gold Coast with a fun casino-themed cocktail party. Fun was had by all who attended, including Karen White and Tony Doyle.

Noosa Sanctuary on display

HUTCHIES' team members working on the Noosa Sanctuary project have received a pat on the back for their part in preparation of a display unit.

Development manager, James Adams, described Noosa Sanctuary as a complicated and extensive project, with numerous challenges along the way.

"From conception, every aspect of this project was actively managed by Chris Stevenson, from the pre-approvals to the day the keys were

handed over to me," said James.

"Chris and his team worked tirelessly to deliver this project – no corners were cut in the design and high quality materials and contractors were used to complete the project.

"The team assisted my sales staff whenever possible and allowed us as much access as could be safely managed.

"This is a professional construction unit that Hutchinson Builders should be proud of," he said.

 Hutchies Site Manager: Geoff Newton
 Hutchies Cost Planner: Martin Tanner
 Design: Morris - Nunn and Associates
 Structural & Civil Engineering: Gandy and Roberts
 Quantity Surveyor: WT Partnership

LOWER KING STREET, CABOOLTURE

Job Value: \$4,834,000

Job Description: 18 x 2 Bed Apartments and 10 x 1 Bed Apartments for Department of Communities.

Hutchies Team Leader: Brad Miller
 Hutchies Project Manager: Scott Woods
 Hutchies Administrator: David Silk
 Hutchies Site Manager: Pat Boutken
 Hutchies Cost Planner: Michael Michell
 Architect: Idarchitecture Pty Ltd

Around the clock views of the city

HUTCHIES' team constructing the new Kangaroo Point Park in Brisbane worked to a tight schedule, finishing hours before the official opening by Premier Anna Bligh.

The park has spectacular views over the Brisbane River and the CBD and includes sculptures,

eight look-outs, an amphitheatre, three public barbecues, cafe and toilet facilities.

The greenspace, which replaces the old Southbank Institute of Technology Building, has no gates and will be open day and night to provide locals and visitors with 24 hour views of the city.

New crane for Sydney skyline

Construction of the \$75.5 million, 21-storey residential tower for the University of Technology Sydney in Ultimo has resulted in another Hutchies' crane on the city's skyline this year.

Hutchies' first Sydney crane was installed at The Residence, a \$96 million refurbishment of an office block into prestige residential apartments in College Street, Hyde Park.

TRAVELLING UNDIES

Oh, no ... serial Hutchies' Undies pest is at it again, travelling the world in his Undies. This time John Mason is in Amsterdam, on the Rhine River.

RIGHT: Scott heard how much fun cougars can be, so he put his appeal to the test by flashing his Hutchies' Undies to this attractive trio during a visit to Montaro Zoo, near Adelaide. He thought the reports on cougars were overrated, until he realised these man-eaters were cheetahs. He's still looking for the cougars, though.

Neville Langer (Alfie's brother) lashed out and got his wife, Jodie, a Hutchies g-string for a special occasion. Being the perfect gentleman, Neville modelled the garment to show how it's worn and what stunning visual appeal it can have ... and Jodie does look stunned!

LEFT: Asa Bawaqa thought Dick's Place was a good place to hang out during a holiday in Fiji. He was amazed to discover the establishment got its name from an ancient Fijian custom of naming locations after the owners – in this case, Richard.

Alan uses his Hutchies' Undies to put a shine on his shoes.

Name change

ON March 1 this year Conics became known as RPS.

Last year, Conics joined with RPS, an international consultancy providing world class local solutions in urban growth, infrastructure, environment, energy and resources.

The local teams are now part of a 900 strong workforce, in 23 locations across the Australia and Asia Pacific region.

While Conics' name has changed, its local teams and contact addresses remain the same.

Its continued growth as part of the RPS network means its clients will now benefit from local knowledge, backed up the diverse experience and advice of the broader RPS network.

RPS planner, Alan Irvin, produces a regular column – *Essential Mantips* – in his company's newsletter and his latest tip was "How to shine shoes".

Alan maintains that a clean, good quality rag is an important ingredient for sparkling shoes. He said Hutchies' Undies were ideal for the job and

is pictured demonstrating his technique.

Hopefully, the next Mantip will be "How to remove stains from undies".

HATCHED

LEFT: Rory, Kat and Ollie Dingle with twins, Toby and Jasper, who were born in February.

New grandchild for Karen and Len White is Harrison Mackenzie Edgar Morris, born to Darryl and Kim, on March 29.

William Lenehan was born to Bill and Leah in February.

Jasmine Donna Rose, born to Peter and Nicole in November 2009, is shown with big brother, Zac.

Airlie's Race Week set off as Raft Race

AIRLIE Beach Race Week, which is one of Queensland's biggest annual aquatic events, started as a simple raft race almost 35 years ago ... and Hutchies was a part of it even then.

Pictured are Hutchies' team members, Brendan Signal, Louis Levinson, Peter Moran and Ken Gould, with their entry into the 1976 Airlie Beach Raft Race – the event which evolved into the now famous Airlie Beach Race Week.

Some say Hutchies' team won, but others say they sank and swam the course. Nobody remembers for sure – and race week these days is still a bit that way!

Peter Moran started with Hutchies as an apprentice in 1963 – two years after Barry Butterworth (Hutchies longest serving company member) – and finished in 1982 to set up his own business in North Queensland.

Peter got his start with Hutchies through his local priest in South Brisbane who knew Eric Hutchinson (Jack's uncle) from the company yard in Montague Road.

During the 1970s, Hutchies built most of Airlie Beach's main street with projects including Wanderers Paradise, Whitsunday Village, professional centre, hardware store, National Bank and renovations to the Airlie Beach Hotel.

Hutchies is still active at Airlie Beach, currently working on Meridien's Port of Airlie Project, Queensland's new gateway to the Barrier Reef.

FLASHBACK ... Hutchies team members, Brendan Signal, Louis Levinson, Peter Moran and Ken Gould, with their entry into the 1976 Airlie Beach Raft Race.

The genesis of the Race Week came to light as part of Hutchies' research for the centenary celebrations planned for 2012.

If anyone has interesting photos or information please contact Tracey Fryer at Hutchies or email (tracey.fryer@hutchinsonbuilders.com.au)

Aidan Jackson Doyle, son of Tony and Nicole, was born at Atherton Hospital.

Work mates' helping hand

KEVIN Heenan, Workplace Relations (pictured right), recently had the pleasure of presenting Hutchies' John Booth with a cheque of \$10,556.15 raised through the generosity of his work mates.

The funds are intended to help John out after a stay in hospital. John wrote:

"I would like to take this opportunity to express my heartfelt thanks to Kevin Heenan, Hutchinson Builders, Paul Hart team, Builders Labourers Federation, my brother, Michael Booth, and all the workers and staff who supported the raffle that was organised.

This was completely unexpected and I was abso-

lutely overwhelmed when I was presented with the donation.

It is hard for me to put into words how genuinely thankful I am to everyone involved; your kindness will not be forgotten.

I am grateful to all of you for your support at this time and wish you all the very best in the future.

I am honoured to have had the opportunity to work with and be associated with such a wonderful group of caring people.

Please accept this letter as a token of my sincere appreciation.

Thanks again."

Warm regards, John Booth

Champ has star quality

LINDSAY Keefer, Hutchies' team member in Toowoomba, has developed a keen interest in the 2012 Olympic Games ever since his 14-year-old daughter, Claire, was identified recently as a likely candidate.

Claire captured three U16 titles in national competition in Sydney, winning discus, shot put and javelin.

The high school student's effort included an Olympic B qualifier in the shot put.

Claire was born with achondroplasia, a condition characterised by a normal length body and disproportionately short arms and legs.

Although Claire took up her sport less than 12 months ago, she now has her hopes set on the 2012 Paralympics.

Australian officials who were impressed with her efforts in Sydney are now watching her performance in the lead up to the 2012 Games.

New skate park proves popular

HUTCHIES' work on new skate parks is putting smiles on faces across Queensland.

The second skate park built by Hutchies was for the Townsville City Council and proved to be an instant success with the local thrill seekers.

Hutchies first skate park was Riverway, which opened in September, 2009.

During the design and construct process, Riverway Skate Park's overall skating area was increased while keeping to the Council's fixed budget for the new sporting facility.

Waves of support at surf competition

Some of the guys who surfed on the day for the Hutchies' team and got through to the semi finals were Corey Lovell, Nat Smith, Dale Walker, Richard Ainsworth and Shane Slape.

SURFING helped bring a Tweed community together recently when a surf competition was held in support of local bashing victim, Sam Ford.

Sam, son of Hutchies' Margaret Ford from the

Tweed office, suffered brain injuries during an assault in Coolangatta last year and is undergoing rehabilitation at the Gold Coast Hospital.

Proceeds from the competition held in his honour and a raffle on the day

went towards Sam's medical expenses.

For the first time in five months, Sam was able to leave hospital for a few hours to attend the competition organised by his surfing mates.

More prizes than ever!!!

Scratch-its

If your Hutchies' Scratchie matches the lucky numbers listed you are a winner! To claim your prize telephone Hutchies on (07) 3335 5000.

Prizes compliments of Hutchinson Builders.
