

Miner housing major priority for BMA Coal

HUTCHIES is currently involved in the replacement and refurbishment of houses for BMA Coal in Queensland's Bowen Basin.

Managing director, Greg Quinn, said that, over the past couple of years, Hutchies had constructed major projects for BMA throughout the Bowen Basin valued at around \$600 million.

He said, while some of the projects had been on mine sites, many were accommodation projects built directly for BMA, such as construction of new villages, new modular and in-situ houses and townhouses, as well as maintenance and refurbishment of existing dwellings.

"Hutchies has played an important part in BMA's commitment to provide quality accommodation for its workforce throughout the Bowen Basin," said Greg.

"Hutchies' participation in the Bowen Basin has required a significant commitment of our own and

at one stage we had 438 workers spread across BMA's projects.

"That capability highlighted one of Hutchies' greatest strengths – being able to mobilise and manage large workforces and ensure they are accommodated and looked after well in the process."

The replacement housing process includes the full demolition or removal of existing dwellings and new modular or insitu-built houses then supplied to BMA.

Meanwhile, the renovation process includes full renovation of each dwelling to BMA specifications, complete with new appliances and air conditioning systems.

Through both processes, the client receives 'as-new' dwellings.

With both replacement and refurbishment, a full turnkey approach is applied to each dwelling, starting with the design process and pricing.

Externally, all dwellings have

ABOVE: A new home built for BMA mine workers.

RIGHT: Modular townhouses built for BMA, manufactured by Hutchies' Modular Division at Yatala.

new driveways, paths, carports and 6m x 3m sheds installed and all houses are fully fenced as necessary, including turf and landscaping.

Each property has hard and soft landscaping installed because of the high maintenance costs in the harsh weather conditions of the Bowen Basin area.

Hutchies also is working on the installation of 50 modular townhouses for BMA, with all modules manufactured by Hutchies' Modular Division at Yatala.

Because of the long travel distances between Yatala and the Bowen Basin, precise logistics and programming are vital to deliver this project on time.

Coordination of all materials, especially long lead time items like garden sheds, garages, car ports, tanks and water pumps, is of great importance.

Greg said the market had clearly softened in recent times and consequently Hutchies' focus was on finding new opportunities to keep all its people engaged in work.

A before and after house refurbishment.

Jimmy builds a staircase on his climb to recovery [Full Story on Page 7.](#)

Among the first to enjoy the new walkway on Magnetic Island were (from left) Hutchies' team members Dan Gallagher and Darren Bozsan along with Project Manager Townsville City Council Infrastructure Services, Claudia Brassard, former Minister of Regional Australia, Regional Development and Local Government, The Hon. Simon Crean, the Mayor Councillor Jenny Hill and Hutchies' Mark Phillips.

Scenery and safety for island paradise

AN 800-metre long walkway built by Hutchies on Magnetic Island in North Queensland has been an instant success with locals and tourists by providing safe and spectacular views over the Coral Sea.

The \$5 million walkway, known as Gabul Way, connects Nelly and Geoffrey Bays and complements the island's existing 25km walking track network.

Townsville Mayor, Cr Jenny Hill, said that, in addition to its aesthetic appeal, the walkway had greatly improved public safety by separating vehicular traffic from pedestrians and cyclists who had previously shared a narrow, winding road between the two bays.

Mark Phillips, Hutchies' team leader in Townsville, described the project as "difficult and dangerous" due to being built on the side of hill overlooking the ocean.

"Motorists and the construction

team had to contend with one-way traffic, day and night for four months," said Mark.

"There also was full road closure for approximately 10 hours each night for one month to allow lifting of 42 precast panels weighing 10 tonnes each."

The project was accident free – highlighting the great job done by Hutchies' team!

Hutchies started work on the walkway in May 2012 and finished before Christmas, with an official opening in March by Simon Crean, the former Minister of Regional Australia, Regional Development and Local Government.

The project was a joint effort with the Federal Government providing \$4.79 million through its Regional Development Australia Funding program and the Townsville Council contributing \$500,000.

The new walkway that connects Nelly and Geoffrey Bays on Magnetic Island enjoys spectacular views of the Coral Sea.

IT is now six months since our last centenary celebration where during 2012 we held 16 very different functions in 16 very different towns and cities.

Each function was designed, organised, budgeted and paid for by company members from the office where the celebration was being held.

Interestingly, each reflected the cultural differences of the Hutchies' office and the town or city in which they were celebrated.

This empowerment and devolution of authority and responsibility does not just occur with our celebrations but across our entire construction operation and I believe this is Hutchies' greatest cultural strength.

- *Finding good people.*
- *Trusting good people.*
- *Rewarding good people.*

The spirit and behaviour at each function reflected the trust

we have in our people.

This is the only way we can effectively run 200 projects at one time.

Every one of the nights went well and was without incident and we had an open, unlimited bar at every one.

In Brisbane we had more than 5000 people drinking for more than two hours ... then we brought the Prime Minister out right in front of them.

I was sitting next to her on the stage and the only comment I heard yelled out from the crowd was "Julia you are a fox!" – a compliment that the prime minister appeared to enjoy.

Once again we found at Hutchies that, if you show real trust in people, this loyalty will be reciprocated.

– **Scott Hutchinson, Chairman**

Coles flagship rises from floodwaters

Coles has reopened in Ipswich with the launch of a large, new flagship superstore to replace the one lost in the 2011 floods.

COLES is back in business in Ipswich with the opening of a large new flagship superstore to replace the one which was engulfed just two years earlier in the devastating 2011 floods.

Hutchies got the job of demolishing the old store which was completely destroyed and building its impressive 6000m², flood-proof replacement.

Ipswich Mayor Cr Paul Pisasale officially opened the superstore in February and described it as "a new dimension in food retailing".

"This new Coles is flood-proof and is one of the largest (Coles) stores in Australia," Cr Pisasale said.

"They have built a fantastic, quality product that is a world leader."

As well as providing a further 120 customer carparks, the new Coles has been designed and built to the latest Coles requirements and includes an instore market-style layout with the emphasis on fresh produce.

Remote projects boost indigenous involvement in construction work

HUTCHIES' Cairns team has demonstrated creativity and innovation with indigenous involvement in the Hope Vale Multi-Purpose Centre project in North Queensland.

Paul De Jong's team, with the assistance of Hutchies' indigenous program coordinator, Mark Kucks, has worked closely with the client, Hope Vale Aboriginal Shire Council, for a plan that will achieve employment opportunities for the local indigenous community.

In addition, Hutchies has employed two new apprentices, Cheston McLean, an ex-Council apprentice, and new-starter, Leonard Casey. The boys receive part of their apprenticeship induction via Skype, which is being trialled as a training tool due to the remoteness of Hope Vale in Far North Queensland.

Apprentice coordinator, Peter Forsingdal, who visits the boys in the community says they are progressing well.

The Cairns team soon will

From left, Sam Sedeek, Paul Lacey, Kurt Spicer and Toolalla Duncan are currently completing their training at Hutchies' 7SD Facility with support from the Toowoomba team.

commence an \$11 million rehabilitation facility in nearby Cooktown which also will have indigenous employment and training requirements under the Government's 20 per cent Indigenous Employment Policy.

The plan will be to provide continuity of work for many of

the Hope Vale people across both projects.

Currently, indigenous apprentices make up eight per cent of Hutchies' apprentice workforce.

In addition, Hutchies' Gold Coast School of Construction (GCSC) is delivering two indigenous pre-apprentice training programs for specific clients through the Yatala and Toowoomba campuses and many of these will go on to full time careers either with Hutchies or its sub-contractors.

In partnership with Arrow Energy and Energy Skills Queensland, Hutchies' GCSC Campus in Toowoomba has commenced training four indigenous young men who are looking to start a career in the construction industry.

They are currently completing training operations at Hutchies'

Hutchies' new apprentices, Cheston McLean and Leonard Casey, receive part of their apprenticeship training induction via Skype, due to the remoteness of Hope Vale in Far North Queensland.

7SD Facility with trainer, Peter Rowse, supported by Craig Gooderham and the rest of the Toowoomba team.

On completion of their work experience phase of the program they will be seeking full time apprenticeships.

Work on Woolies a boon to tourist town

WHITSUNDAY Regional Council hopes that a major Woolworths store now under construction by Hutchies in Airlie Beach will attract an influx of new businesses to the North Queensland tourist town.

Mayor Jennifer Whitney said Council welcomed new development to Airlie Beach's main street.

"Any development that opens up ongoing employment opportunities in the Whitsunday region is good," she said.

"It's great to see Woolworths take the lead and hopefully other businesses will follow."

Woolworths senior development manager, Graeme Jones, said the new supermarket would deliver a full range of services and 150 new jobs in the long term.

"Hutchinson Builders was the team that delivered our new store in Ooralea last year and we are thrilled to have them working with us again," he said.

The 2800m² supermarket, located behind well-known landmark, Magnums, also will provide

From left, Woolworths property manager, Aaron McAdam, and Councillors Jan Clifford, Andrew Wilcox (Mayor), Jennifer Whitney and Kevin Collins, discuss Woolworths store currently under construction in the main street at Airlie Beach.

a new customer carpark with 208 car spaces.

Construction started in March and the store is expected to be fully operational by February next year, with 120 workers on site during the peak building phase.

Hutchies' regional

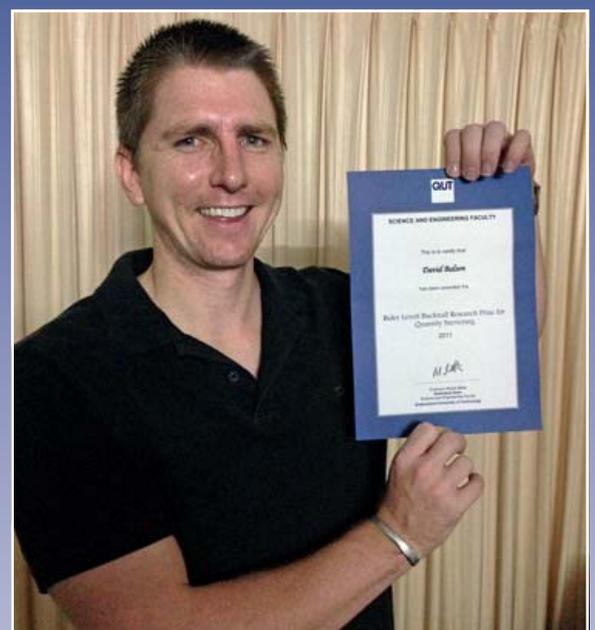

manager, Levi Corby, estimated construction would be completed by late November, depending largely on weather.

"It will then take Woolworths about eight weeks to fit out the store and be ready to go in February," Levi said.

Can't get enough of the Truth?

DON'T forget the Hutchies' Truth is available on our website.

Prize-winning, clean shaven Dave Balson.

Major achievements for Dave

DAVE Balson, Hutchies' Townsville team, recently received the Rider Levett Bucknall Research Prize for Quantity Surveying for the 2011 academic year at Queensland University of Technology.

Proudly showing his award from QUT's Science and Engineering Facility, Dave also shows off his new Shave for a Cure hair cut which raised \$2,024 from 27 sponsors, including Hutchies, for cancer research.

Dave was inspired to Shave for a Cure by his dad, Terry, who is battling lymphoma.

"They say be brave and shave, but it's nothing to shave my head," said Dave.

"Dad's the brave one. Now it's my turn to help make as many people as possible aware of blood cancer."

Caring community to replace failed public housing complex

HUTCHIES is helping the Tasmanian Government convert a public housing complex with a violent history into a caring community with a bright future.

Tasmanian Housing Minister, Cassy O'Connor, recently announced that Hutchies and Tim Penny Architecture and Interiors would work on the \$5 million refurbishment of a troubled 1950s public housing complex which had been earmarked for demolition.

Hobart's Stainforth Court is acknowledged by the Tasmanian Government as a failed broad-acre public housing experiment of the past and the new concept will be an example of how public housing can be done better.

Housing Minister O'Connor said

lessons had been learned from the well-intentioned mistakes of the past.

"We are reforming social housing with an emphasis on community, liveable design and social diversity," said Ms O'Connor.

"We want this complex to be a place where tenants feel a strong sense of community and a place they are proud to call home."

Hutchies' team leader, Mick Connolly, said the refurbishment of the units would help reduce living costs for tenants, with efficient heating systems, solar hot water and cost-effective lighting.

New features of the complex will include a video intercom system, privacy screens and community spaces with raised garden beds and worm farms.

The revamped Stainforth Court units as visualised by Tim Penny Architecture and Interiors.

Painstaking transformation of Melbourne's heritage-listed Goods Shed South into an innovative commercial space is now complete.

Restoration sheds light on inner Melbourne's history

RESTORATION of the heritage-listed Goods Shed South into a two-level, high-end commercial space and development of an adjacent new six-storey tower in the heart of Melbourne is now complete.

The \$49 million refurbishment in Collins Street, Docklands, presented an opportunity to renew an integral part of inner Melbourne's history with a modern, sustainable design sympa-

thetic to its heritage value.

Hutchies undertook the painstaking refurbishment of the Goods Shed South and clock tower as well as the construction of the new section, known as the Lantern Building.

The interiors were designed to be an innovative and contemporary commercial space while retaining the key historical elements of this inner Melbourne landmark.

Best practice neutralises acid sulphate dilemma

HUTCHIES has been praised for its work to remedy acid sulphate contamination found on a client's site in Gladstone.

The acid sulphate was an unexpected find on QGC's Gladstone Supply Base project site, given that the location was not considered an "at risk area" because acid sulphate is usually found in low lying coastal areas.

Hutchies' quality and environment manager, Rita Mann, said it was thought that the ground soil could have been previously transported from elsewhere and deposited at the GSB location.

"When acid sulphate

A grader distributes 24 tonnes of lime to neutralise acid sulphate deposits found on the Gladstone building site.

soils combine with air, oxidation occurs and iron sulphates are formed and when this soil mixes with water, sulphuric acid is produced," she explained.

It was determined that

the use of 24 tonnes of lime to neutralise the levels of acidity would be the best remedy to meet best practice guidelines, legislative and local council requirements, cost effectiveness

and minimise impact on the project program.

The acid sulphate spoil was treated with lime and spread across the site, using a tyne and turn method on a grader, with the additional lime assisting in the compaction of the soil.

On completion of the remedial work, all reports returned from NATA approved laboratory, Cardno Bowler, cleared the site of acid sulphate soil.

Hutchies' Chairman, Scott Hutchinson, said Hutchies had adopted an environmental commitment to continually improve its performance, make efficient use of natural resources and aspire to

zero harm to people and the environment.

"On the QGC site, Hutchies was able to maintain its commitment to the environment while satisfying all local, state and federal government requirements and without imposing excess cost and delay to our client," said Scott.

QGC stated that the process was well managed from the investigation process, risk management, execution of the works and follow up of outstanding actions.

"The immediate attention and resource planning for the change was exceptionally managed," QGC concluded.

Bridging an important gap in \$20 million rail upgrade

QGC personnel had no problem lending a hand with some concrete placement for the new Gladstone Supply Base. Pictured (from left) are Mick Birch, Peter Thompson, Hutchies' Jason Williams and Mike Hearn.

New supply base for QGC

HUTCHIES' Toowoomba is building QGC's new \$4.5 million Gladstone Supply Base to enable it to efficiently service a new export facility on Curtis Island.

This design and construct contract continues Hutchies' strong relationship with QGC, which was established with projects such as the Miles Supply Base and Chin-chilla office.

A CRITICAL milestone in the \$20 million upgrade of the Sandgate railway station in Brisbane went off without a hitch recently when Hutchies lifted a new 11-metre footbridge into place, using a 220-tonne crane.

The new footbridge was fabricated on site then lifted into place alongside an existing bridge during closure of the busy rail tracks.

Member for Sandgate, Kerry Millard, said Hutchies' upgrade would improve station facilities and disability access.

"Sandgate is one of the busiest stations on the Brisbane network with more than 1000 customers using the station during each peak period," said Ms Millard.

The upgrade, which is part of Queensland Rail's \$200 million station upgrade works throughout the state, will include raising of both platforms using pre-cast coping

A new 11-metre footbridge was lifted faultlessly into place at the Sandgate Railway station by a 220-tonne crane.

panels, removal of existing footbridge and reinstatement of new overhead footbridge, a refurbished station building, ticket office and toilets, additional platform waiting shelters, passenger information display screens and lifts and stairs to platforms from the new footbridge.

Hutchies conducted all works while maintaining

public access to the station which required intensive planning complemented by QR operations.

The changes will improve accessibility and ensure the station is fully compliant under the Federal Disability Discrimination Act 1992 (DDA).

The project is scheduled for completion mid-year.

I AM writing to express our sincere appreciation for the professional and timely way in which Hutchinson Builders managed the recent construction of our Trade Training Centre.

We were particularly impressed by the high level of consultation that occurred throughout the project, with the staff of Hutchinsons showing a high degree of flexibility and responsiveness to the plethora of questions and requests for minor changes that occurred from time to time.

Geoff and Joe were particularly approachable and accommodating and I wish to thank them especially for their leadership and support.

Geoff kept us up to date with regular meetings and with frequent walkthroughs and the regular formal meetings were well planned and informative.

It was obvious that the project was well planned and executed with very few delays or changes.

Everything appeared to flow smoothly and the rate at which construction progressed was very impressive.

We now taken delivery of an excellent Trade Training Centre that will provide enormously enhanced learning opportunities for our students along with opportunities for our local community.

**- Sean Maher,
Principal,
Miles State High School**

AT the beginning of the year, Ipswich again had to deal with flooding. Fortunately for me, Hutchinsons was finishing the new Coles and through your generosity and kind heartedness helped me empty my shop and store much of my stock so as to avoid the

devastation that happened to us in 2011.

Thank you very much for your help during this time.

- Carol Hooper, Hoopers Carpet One

WE live in Scotland and I stumbled across Undercover Boss Australia during Sunday night television.

I was struck by the unity of your workforce and how many of them truly enjoyed their jobs and wanted to make a difference to the company.

In today's climate and size of organisation, that is a rarity.

It was also amazing to see a family business grow to such a large entity but still retain its core values.

We have been thinking about moving to Australia for a while,

but never really jumped the final hurdle.

Watching your programme tonight has really spurred me on to make the move.

- Stephen Bird, Edinburgh

TO the guy in Undercover Boss.

What a credit you are to the construction industry.

I only wish there were companies as diligent and honest and honourable here in the UK as yours.

Maybe if I had come across your company 15 years ago when I worked in Australia I would still be there now, laying tiles in the sun instead of here in London in the wind and rain.

Loved the program and you've got to be very proud of what you are representing and creating,

I come from a very long line of wall and floor tilers and can relate to your pride.

Nice one.

- Eddie Gilbert

NQ brickies are world quickies

DANIEL Stevens, Extreme Bricklaying, Matthew Crebert, Modern Brick and Blocklaying, and Roy King, Pumping Bricks, all of Townsville, travelled to Las Vegas recently to compete in the world's Fastest Trowel on the Block competition.

The event attracted competitors from all over the globe to the Las Vegas convention centre to compete for the prestigious title of Fastest Trowel on the Block and \$6000 in prize money.

The trip to Las Vegas was a follow-on

from a Townsville competition, NQ Supa Trowel.

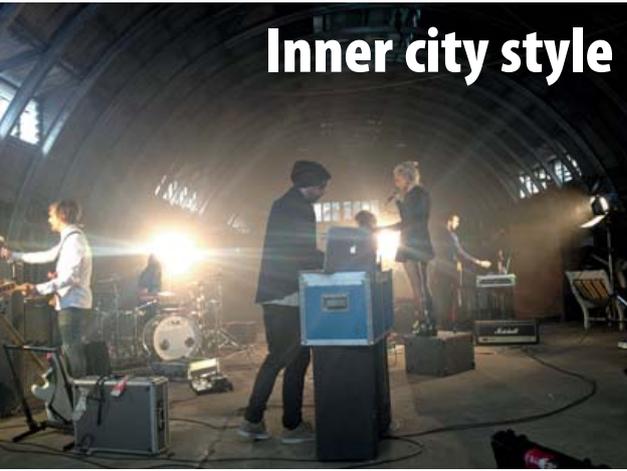

Matthew Crebert won the the local competition and prize money, which he used to fund the trip to Las Vegas.

The Townsville team consisted of Mathew as blocklayer and Roy and Daniel as blocklayer's labourers.

The team was placed twelfth in the international competition, with Matthew now laying claim to being the "world's 12th fastest blocklayer".

From left, Daniel Stevens, Matthew Crebert and Roy King, clinch the title of World's 12th Fastest Blocklayer and Labourers Team.

Inner city style

Band members of The Hangout chose Hutchies' Stratton Street warehouse as the venue for a music video.

HUTCHIES' Stratton Street warehouse in Fortitude Valley, which is earmarked for redevelopment at some time in the future, enjoys current use as a trendy inner city venue popular for musical and fashion events and photographic shoots.

The latest event was a music

video clip by the Brisbane city band, The Hangout.

Members of The Hangout are Erinn Swan, Matty Newton, James See, Damon Whiteley and Anthony Mathews.

Visit the website address www.thehangoutsound.com for more on The Hangout.

Trip Advisor tick for Kipara retreat

ON high profile travel website, Trip Advisor, Kipara Tropical Rainforest Retreat, Airlie Beach, enjoys an excellent rating for its quality and performance.

Currently rating an average of 4.5 out of a possible 5 on Trip Advisor, Kipara is ranked 7th out of 33 in the category of specialty lodging in the area.

Shirley Manners, manager at Kipara Tropical Rainforest Retreat, said she was delighted with the feedback on Trip Advisor, given the outstanding quality of competition in North Queensland's tourism accommodation sector.

She said Kipara was also rating extremely well with excellent feedback on other popular travel bookings websites such as booking.com and wotif.

Hutchies-owned Kipara is located on an immense property and surrounded by lush tropical rainforest.

It offers a wide range of facilities in private rooms, cabins and villas and is the perfect rainforest retreat for an affordable overnight visit, family holiday to the

Whitsunday Islands or for a long-term to semi-permanent stay in Airlie Beach.

The retreat has two fully equipped camp kitchens, pool and sundeck area as well as guest laundry facilities, internet cafe, wireless internet access and free tour bookings service.

A large function/entertainment room, with a seating capacity of more than 80, is also available for functions, training and classes.

Visit the website <http://www.kipara.com.au> for more information and bookings.

School children help create fun park

SCHOOL children helped design a new fun park to be built by Hutchies in the port city of Gladstone.

The water park by Urbis is believed to be the only one of its kind in Australia and involved consultation with school children in its creation.

Hutchies faced stiff competition to win the contract for construction of the \$45 million first stage of the new East Shores development on Auckland Inlet.

There were 35 expressions of interest and six invited tenders to build stage 1A of the Gladstone Coal Exporters Maritime Precinct which will include a water play area,

Artist's impression of the \$45 million Stage 1A of the East Shores development in Gladstone which includes a water park designed in consultation with school children.

open parkland, barbecues, boardwalk, fishing platform and walkway to Auckland Hill.

The project will be funded by the Wiggins Island Coal Export Terminal (\$35

million) and the Gladstone Port Authority (\$10 million).

Construction is expected to begin by June and be completed within 12 months.

Work has started on an eight-level basement carpark as the first stage of a larger development planned for Mary Street, Brisbane.

Rob's a charmer

HUTCHIES' site manager in Cairns, Rob Mahony, displayed his best charming technique when a large snake turned up uninvited to the Cairns office. Rob (left) assisted Shane with the capture and relocation of the oversized and unwelcome reptile.

The gang's all here ... again

The crew of the Brisbane Gang Show at first rehearsal.

THE Brisbane Gang Show, a theatrical and musical revue organised by the Queensland Branch of the Scout Association of Australia, is in its 62nd consecutive season this year, with Hutchies as a major sponsor.

While the audiences enjoy the performances, many members of the Gang Show have found that the skills learned in the show have led to lifetime hobbies in areas related to the performing arts or to professional careers in film, television and stage.

The Brisbane Gang Show will run from June 28 to July 6. All are welcome to attend. Visit <http://brisbanegangshow.scoutsqld.com.au/tickets.html> for more information and bookings.

Library chapter and verse on design

THE Cooroy Library built by Hutchies' Noosa team for the Sunshine Coast Regional Council has won the Gabriel Poole Award for Building of the Year in the Australian Institute of Architects regional awards.

The award was presented to lead architect Ian Brewster, of Brewster Hjorth.

The architects, known for their contemporary designs for public

libraries and public spaces, worked with the community to develop the award-winning Cooroy Library design.

The practice also has won prizes for the Rockhampton City Library and the Eddie Mabo Library in Townsville.

The Cooroy Library is an automatic entry in the Queensland Architecture Awards to be announced in Brisbane on June 21.

Jimmy builds a staircase on his climb to recovery

Early this year workplace accident victim, Jimmy Walsh, passed a functional assessment at the Gold Coast School of Construction with flying colours.

HUTCHIES' company member, James "Jimmy" Walsh, was injured in August 2011 in a tragic workplace incident.

Since then Jimmy has been on the steady road to recovery.

He initially spent months in the Brain Injury Rehabilitation Unit at Brisbane's Princess Alexandra Hospital and has continued his rehabilitation at home under the guidance of numerous allied health professionals.

Jimmy has exceeded all expectations throughout his recovery which could not have been possible without the support of his immediate and extended family.

Health and Safety Manager, Gareth Davies said that the attitude Jimmy had shown through this life-changing incident was a credit to himself and his family.

In January, Jimmy had progressed well enough in his recovery to be taken to Hutchies' Yatala Modular Facility to perform a functional

assessment at the Gold Coast School of Construction.

He undertook the external stairs exercise which included reading the project sheet, interpreting plans, measuring and cutting materials and assembling the stairs with balustrade.

He was supervised by Hutchies' apprentice development coordinator, Andrew Becconsall, who said Jimmy had performed all tasks well with minimal supervision and that his knowledge of the use of power tools regarding safety and methodology was excellent.

Since the success of his functional assessment at Yatala, Jimmy has been working on regaining his driving status with the ultimate goal of a full return to work.

Meanwhile, Jimmy and wife Monica are planning to travel to Ireland in August for a much-deserved holiday and to catch up with close friends and family.

The Hutchies-built Cooroy Library is a design award-winner for architects, Brewster Hjorth.

DYSART HOUSING RENOVATION PROJECT

Job Value: \$12.32M

Job Description: Project consists of the complete renovation of existing homes to as-new condition in the Dysart and Moranbah townships.

Hutchies' Team Leader: Kevin Whitaker
 Hutchies' Administrator: Evan Reid
 Hutchies' Supervisor: Jay Archer & Steve Turnbull
 Hutchies' Cost Planner: Nick Gubbin & Kevin Whitaker
 Architect Firm: Various as required
 Structural Engineering Consult: Various as required
 Client: BMA COAL

DEMO FY12 HOUSING REPLACEMENT PROJECT

Job Value: \$7,222,400

Job Description: The project consists of the demolition and replacement of existing homes in the Dysart and Moranbah townships.

Hutchies' Team Leader: Kevin Whitaker
 Hutchies' Administrator: Evan Reid
 Hutchies' Supervisor: Jay Archer & Steve Turnbull
 Hutchies' Cost Planner: Nick Gubbin & Kevin Whitaker
 Architect Firm: Robert Day Architects

 Structural Engineering Consult: Bonacci Group
 Structural Engineering Consult: Robert Bird Group
 Quantity Surveyor: Grey Robinson & Cottrell
 Client: Mary Street Old Developments

Artist's impression of the \$11m Cape York Residential Rehabilitation Centre under construction in Cooktown.

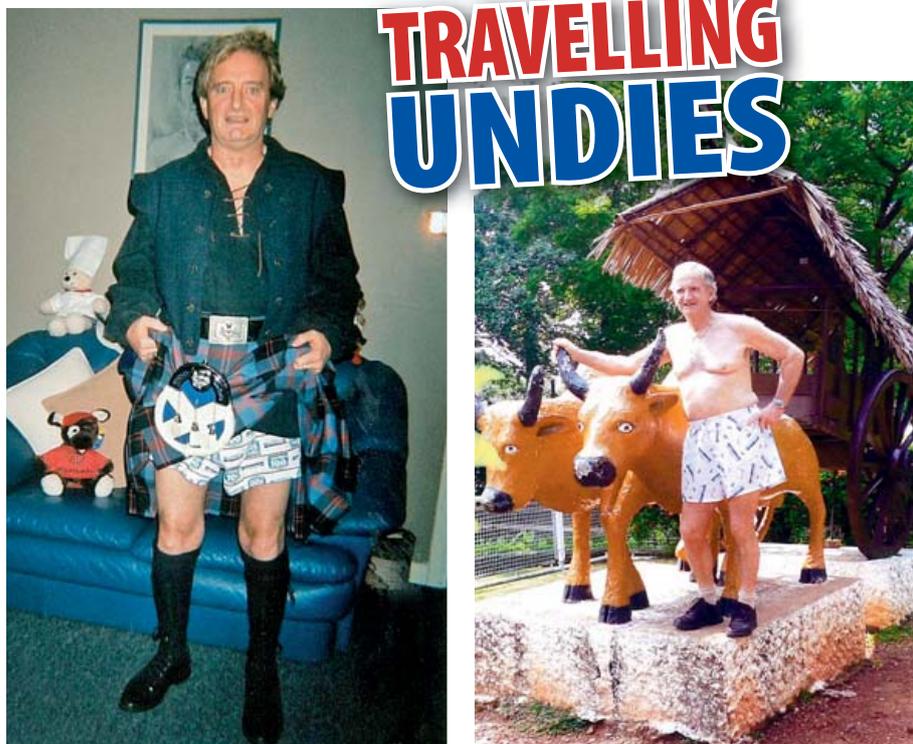

Daniel Stevens, Extreme Bricklaying, and Roy King, Pumping Bricks, almost bared all when they visited the Big Bear Lakes, California, but they insisted on keeping their shoes and socks on.

Archie Fairweather, nephew of Hutchies' health and safety officer, Monica O'Neill, fitted in when he visited the Cowboys Stadium in Dallas, Texas, with a helping hand from his dad, Michael Fairweather. Hutchies' Undies match the blue and white colours of the Cowboys – the most valuable sports franchise in the USA.

Hutchies' Terry Bowden (left), his daughter, Elizabeth, and apprentice, Matt Wicks, created a cultural shock when they downed trousers to flash their Undies mid-snowfield during a visit to Hakuba in Japan.

TRAVELLING UNDIES

Jimmy Murray, from Hutchies' Chatswood site in Sydney, showed the folks back home what Aussie Scotsmen wear under their kilts when he visited Scotland during the Christmas break. The teddies look horrified!

The beasts of burden were obviously petrified when serial Hutchies' Undies exponent, John Mason, approached this traditional oxen and cart to pose for a photograph in the ancient trading seaport of Malacca in Malaysia.

O-B-I-T-U-A-R-I-E-S

FORMER Hutchies' team member Dragan Golubovic passed away on February 20, aged 63. Dragan was a top civil and structural foreman. He was tough but fair, but always a true gentleman. His accent may have been difficult to understand at times, but he always got his point across. His co-workers, subbies, and colleagues had great respect for him. He had worked on Calamvale and Chermside shopping centres as well as the Scott Street apartments.

•••
GARY John Howcroft passed away on February 23 aged 64.

Howcroft, as he was known, was a CFMEU Organiser.

The service at Mount Thompson Crematorium included music by Warren Zevon, Johnny Horton and Johnny Cash, poetry by Henry Lawson and words by Bob Reed, Hughie Hamilton (former secretary of the BWIU), Wallace Trohear (former secretary of the CFMEU), Billy Hunt and

Amanda Howcroft.

Thanks to all from partner, Dominique, daughters, Amanda and Meesha, siblings Dianne Beazley and Billy Howcroft and grandchildren, Dylan Bowman, Lilly Bowman, Sienna Jackson, Jude Bowman, and Charlotte Jackson.

•••
WILSON Fishing, a corporate partner with Hutchies for many years, advised of the tragic news that general manager, Kord

Luckus, recently lost his father in a horrific car accident on the Story Bridge in Brisbane in April.

Kord's father, Vid, a cab driver for 17 years and former teacher at St Laurence's and Villanova, was the victim of a head-on crash.

Yellow Cabs will retire cab number 546 from its fleet as a mark of respect.

Hutchies' condolences go to Kord and his family and to our friends at Wilson's Fishing.

HATCHED

HUTCHIES' TRUTH

Eleila Giselle Todd, first child for Tim Todd and Giselle Van Reenan, arrived on January 30.

RIGHT: Louis Samuel Alroe, new son for Jesse and Rachel Alroe born on March 13, dreams of a big future in construction.

Taj James Duncan who arrived on March 28 is the celebrated first child of Nicole and Leigh Duncan.

RIGHT: Lisa and Jon-Paul Floyd welcomed their second daughter, Tahlia Margaret Alice Floyd, on March 14, pictured here with big sister, Makayla.

Successful start for Tradestart trainees

Some of the new intake of students at Hutchies' Gold Coast School of Construction at Yatala learned the valuable lesson that the building game can be full of surprises. As part of their skills acquisition, five of the Tradestart students accompanied their trainer to help a family whose home near the Broncos Football Club in Red Hill, Brisbane was damaged by flash flooding earlier this year.

THE Gold Coast School of Construction (GCSC) Yatala Campus has had a successful start to 2013 with the first Tradestart trainees for the year graduating from the program.

From the first cohort of 11 students, eight have commenced apprenticeships.

Another is working as a labourer with a construction company and is hoping to start an apprenticeship in the near future.

One student has returned to university to complete his studies and the other has been accepted into the defence force.

The GCSC has one of the best records in the state for employment outcomes on completion of the Tradestart program.

The Tradestart program, in partnership with Construction Skills Queensland (CSQ), is aimed at young people who have finished school and are seeking a career in the construction industry.

They complete a 12-week course, including a Certificate 1 in Construction, Personal Development and 160 hours of work experience, mainly on Hutchies' and its subcontractors' sites, all aimed at assisting the trainees into apprenticeships.

The program is offered at campuses at Yatala and Toowoomba.

Anyone wanting to find out about potential apprentices or more about the program is asked to contact Cameron McConnell at cmccConnell@hutchinsonbuilders.com.au

Fighting for a reputation

HUTCHIES has taken a promising young boxer under its wing with sponsorship of Liam "The Offender" Hutchinson (no relation), a professional light-middle-weight boxer from Queensland, who proudly fights out of The Boxing Shop.

DB Scaffolding also is sponsoring Liam.

Gareth Williams, head coach and manager at The Boxing Shop, said Liam's recent fight at the Richlands Lions Soccer Club was a great success and thanked Hutchies and DB Scaffolding for their faith in the young fighter.

Crocs on the verge of extinction

HUTCHIES' David Christoffersen is doing his bit to help save the Townsville Crocodiles from becoming extinct.

As a Crocs supporter and member for more than 20 years, Dave has been working tirelessly to save the Crocs.

Dave explained that Barrier Reef Basketball, owners of the Townsville Crocodiles, wants to hand back the licence which would mean the Crocs would cease to exist.

"A steering committee has been formed

to raise \$1 million in foundation membership to form a community-based ownership model, which will keep the Crocs playing for this coming season and in the future," said Dave.

Through foundation membership and donations, more than \$364,000 has been raised already.

Anyone who wants to help the Crocs to survive should contact Dave Christoffersen on 0419 762 406.

Hutchies' Rob and Cath Weymouth with Toowoomba's woodchopping champion, Jamie Head.

Tops in Toowoomba tournaments

HUTCHIES' sponsorship of the woodchopping championship at the Toowoomba Show rekindled a previous association with winner, Jamie Head.

Jamie was employed by Tension Concrete and has worked on numerous Hutchies' sites over the years.

These days Jamie is a full time profes-

sional woodchopper and doing well at it!

...

ALSO in Toowoomba, Hutchies continues to be a big name in the local rugby league scene, lining up again as the major sponsor in the competition known as the Toowoomba Rugby League Hutchinson Builders Premiership.

Going for the proper

GEOFF Kampf, Hutchies' site manager, continues to brag about his trip to New Zealand for the Easter break where he took this 13.5kg groper from a reef off the mouth of the Taieri River, south of Dunedin. The monster was only one of a double hook-up, with the other being a 7kg groper.

Great prizes to be won!

Scratch-its

If your Hutchies' Scratchie matches the lucky numbers listed you are a winner! To claim your prize telephone Hutchies on (07) 3335 5000.

Prizes compliments of Hutchinson Builders.
